

For immediate release: June 9th, 2011

New Regional Spokane/Coeur D'Alene **Website** launched by Gibby Media Group www.spokanedestiny.com

Gibby Media Group, Inc. has launched today "Spokane Coeur d'Alene the Regional Destiny" website www.spokanedestiny.com. The website features over 30 high quality streaming videos on area key area venues. It also contains TV commercials, splash pages and over 300 website links to key regional businesses and organizations.

Streaming videos on the website include a short introduction by Spokane Mayor Mary Verner, videos on Spokane, Coeur d'Alene, Sandpoint and surrounding communities. The website contains streaming videos on major area parks, lakes, special events, cities, recreational opportunities, quality of life, hospitality, real estate, financial, education, medical, business opportunities, and much more. The videos vary in length from 30 seconds, up to 7 minutes HD quality. The website is considered unique because it contains so much interactive regional video content available on one single website focused on the entire region. It will provide the general public and area business a high tech real time tool to help promote and market the entire region to family, friends and business associates. The website also works on Droid devices phones and Zoom pads. GMG is releasing an iPhone and iPad version of the site in July.

Lon Gibby CEO and President of Gibby Media Group, Inc. stated "It has been a major commitment of time and company resources, remarkable for a small media technology company to shoulder. The content was produced over a period of five years, and it will be updated monthly and continue to grow in size and diversity as more organizations come on board with content and advertising. The website utilizes Gibby Media patent pending streaming format pioneered at GMG which typically provides no load time and large screen video presentation, on our worldwide cloud distribution network. We believe this website network will have a major impact and long term positive affect on the marketing of the newly announced Spokane CDA Metro region, 87th in size in the nation. Our analytic's will build as more people discover the inspiring content and enjoy the functionality this website offers". The website mirrors completely online the GreenThin Disc DVD version released earlier this year available in area stores and gift shops". GMG has received International interest for developing similar websites and technology for other cities and regions. **Please schedule a visit to GMG studios at 1213 Pines Rd Spokane Valley Wa.
